

Quotation for: Salfords Cricket Club

Ref: SALF0322

Site Address: Petridge Wood Common, Woodhatch Road, Salfords, RH2 7LU 22/03/2013

To supply and install a new non-turf cricket practice area to the specification and location agreed with Mr Sanjay Patel of Salfords Cricket Club and David Sear of Notts Sport during the recent site visit. Works to include:

Single Lane Option

Preparation

- Remove half of existing concrete platform at the bowling end, and remove broken out concrete from site
- Level grade and consolidate area such that it is suitable for the installation of a non-turf cricket facility (*ECB recommend that gradients are no greater than 1.25% along the line of play, and no greater than 2% across the line of play*)

11.00m x 2.74m ECB Approved Notts Sport Envelope System Batting End

- Clean angular stone to provide solid, free draining base
- NottsFilm geotextile membrane to prevent aggregate layers mixing or becoming contaminated, thereby ensuring the consistency of the upper performance layer and thus allowing future refurbishment of the facility without necessarily requiring full replacement of the base
- New Notts Sport Crease Protector Pads to prevent depressions at the blockhole from bat tapping
- 50mm consolidated depth of selected hard porous aggregate to provide realistic, true cricket performance to UK levels
- 5mm thickness resin-bonded NottsPad shockpad to protect base levels and minimise maintenance
- Chosen surface as below

8.00m x 2.74m NottsPad Bowling End

- NottsFilm geotextile membrane to prevent weed growth from under the aggregate
- Clean angular stone to provide solid, free draining base
- 5mm thickness resin-bonded NottsPad shockpad to absorb impact on bowlers' knees and ankles, protecting against stress injuries, and to help protect levels of base
- Chosen surface as below

Single Lane ECB Recommended Cage & Netting Facility

- 18.30m long x 3.66m wide per lane (7.32m total width) x 3.66m high
- 1.5m gap between back of the batting ends and the cage/netting to meet ECB guidelines
- Manufactured from 3.2mm thick, 42.4mm outside diameter (OD) galvanised tubular steel (*the ECB recommend 3.0mm thick 42.4mm OD steel: therefore this construction is of greater strength than the ECB recommendations. 48mm OD steel is also available if required*)
- ECB recommended 3.66m height allows spin bowlers to vary flight without hitting top bars or roof netting (*4.0m height also available if required*)
- 2.3mm high-tenacity knotless polypropylene netting (available in green or black) to wings, back and full 60' length of roof
- Includes S&C Slatter tensionable line-wire system to prevent balls escaping under netting and to reduce net billowing

Quotation for: Salfords Cricket Club

Ref: SALF0322

Site Address: Pettridge Wood Common, Woodhatch Road, Salfords, RH2 7LU 22/03/2013

NottsSward Low Maintenance Surround Material

- To 0.5m outside the cage and to the back of the bowling ends in order to create fully synthetic area sized 26.10m x 4.66m
- Geotextile membrane in order to prevent the aggregate mixing with the sub-soil, thus preventing the drainage from becoming clogged in later years, and also to prevent any future weed growth from under the aggregate
- Consolidated non frost susceptible aggregate to provide solid, free draining base
- 11mm open-pile, sand-dressed NottsSward to provide clean-standing area, replacing all grass areas in facility, removing requirement to mow in between cage and ends and preventing grooves developing from bowlers' follow-throughs.

Other Works

- Mark out as per the rules of the game
- Reinstate to the outside of the facility
- Spread excavated topsoil and turf around site as requested by SCC
- Remove all generated waste from site
- Leave working area clean and tidy

1. Using NottsGrass NG7 cricket surface for maximum performance

£12,713 + VAT

2. Using NottsGrass NG12 cricket surface for increased spin performance and durability

£13,253 + VAT

Double Lane Option

Preparation

- Remove all of existing concrete platform at the bowling end, and remove broken out concrete from site
- Level grade and consolidate area such that it is suitable for the installation of a non-turf cricket facility (*ECB recommend that gradients are no greater than 1.25% along the line of play, and no greater than 2% across the line of play*)

Two 11.00m x 2.74m ECB Approved Notts Sport Envelope System Batting Ends

- As per page 1

Two 8.00m x 2.74m NottsPad Bowling Ends

- As per page 1
